## Report Development Timeline

In May 2020, the Technical College System of Georgia (TCSG) Information Technology & Data Resources (ITDR) and Office of Adult Education (OAE) migrated GALIS reports from the Crystal server to IBM Cognos to address data security concerns. Since the migration, TCSG has been developing GALIS reports in Cognos to accommodate federal reporting requirements as well as local provider reporting needs.

OAE and ITDR have established the following report development timeline based on user feedback from local providers as well as National Reporting System and OAE priorities. The timeline provides **estimates** of report release dates that are subject to change. Report development may be impacted by many factors, such as data validation and testing.

*Expected release in April 2021:*

- Local level report that provides student contact information for all students.
- Local level Table 4B WIOA report that can be run by instructor and CRN.
- Local and system level staff development participation reports.
- Local level report that provides information on non-IET student training entered into GALIS.

OAE will continue to update this list as reports are developed.

## **GALIS Report Feedback and Data Requests**

To provide feedback on existing reports or request new reports for future consideration, submit your request to [research@tcsq.edu](mailto:research@tcsq.edu). TCSG ITDR and OAE will consider all requests on a case-by-case basis.

If you have an ad hoc data request, contact Director of Research and Impact, Rosaline Tio, at [rtio@tcsq.edu](mailto:rtio@tcsq.edu). OAE will work with ITDR to determine if the ad hoc data request can be addressed within the requested time frame.
